SAFETY CLOTHING

3R70101AL

Description

This fabric incorporates a five-layer structure that consist of an outer layer of aluminum, protective film, a second layer of aluminum, heat stable adhesive and the Para Aramid twill for maximum reflectivity and durability.

Applications

Normally used to create garments worn by firefighters and industrial workers operating in high-heat environments. This fabric potential is limitless du to the unique insulation and heat reflective properties of material.

Specifications

Technical Data	
Weight	11.0 oz/yd ²
Thickness	0.019"
Width	40"
Roll Length	50 yards
Fiber Type	Aramid
Weave	Twill
Finish/Coating	DualMirror II Aluminized
Radiant	3000°F (1650°C)
