ABRASION RESISTANT

Abrasion resistant hose

Description

Rubber hoses lined with ceramic balls are specially designed for extreme abrasion resistance and maximum durability. The ceramic balls design insures wear and impact resistance and allows for good flexibility. Their longer lifetime minimize the need for maintenance and inspection caused by frequent replacement of traditional hoses. Ceramic lined hoses also have good resistance to chemicals. They are custom made to your specific requirements and are available in various types of rubber for various applications.

Available materials

Natural rubber (pure gum)

Synthetic rubber (S.B.R.)

EPDM

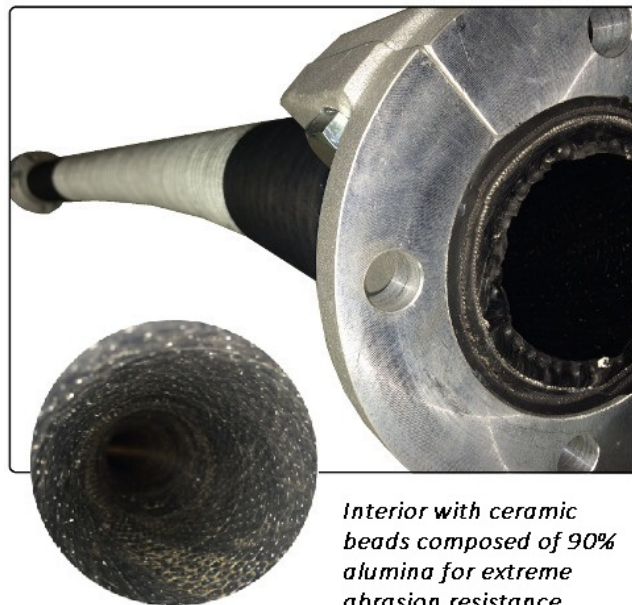

Neoprene

Nitrile

Chlorobutyl

Hypalon

Silicone

Applications

Many options are available:

- Hose cover
- Color
- Vulcanised flanges
- Etc.

Here is the information we need to be able to recommend the hose you require:

- Size
- Temperature
- Application
- Material being conveyed
- Pressure
- Ends configuration
- Delay

Specifications

Available sizes	
3/8" ID to 12" ID	up to 50 ft.
14" ID to 24" ID	up to 24 ft.
