FIBERGLASS

HTB650RO

Description

The HTB650RO cable is made from blue texturized fiberglass yarn reinforced with copper insertion and impregnated with a high temperature silicone treatment. This manufacturing process provides to the product a better sealing property under vacuum and a very good abrasion resistance. It is available in round, square and rectangular forms.

Applications

The HTB650RO cable is regularly used as seals for crucible pot lids.

Specifications

Technical Data

Composition	Blue texturized fiberglass yarn, Copper wire, Silicone
Temperature	1400°F / 760°C
Elongation	0.5%
