

FIBERGLASS

TXP240TR

Description

The Texpro 240TR fabric is produced with high quality texturized fibreglass yarns. Used either to insulate or protect, this fabric is flexible and adaptable to many applications. It does not burn nor emit harmful smoke or vapors when exposed to high temperatures, will not mold and resists to most acids and alkali. The TXP 240TR fabric is treated with a special coating for ease in cutting and sewing operations.

Applications

The TXP 240TR fabric is used as heat shields, fire blankets, welding curtains, protection apparels, to make high temperature removable blankets, stress relieving pads, expansion joints and gaskets. Other typical applications include wrapping tools, pipes, cables to protect against other internal or external high temperatures.

Specifications

Technical Data

Weight	24oz/yd ²
Thickness	0.050"
Width	40",60"
Temperature	continue: 535°C (1000°F)brief excursion: 645°C (1200°F)
Length	50 yd/roll
