FIBERGLASS

TXP415

Description

The TXP415 is a satin weaved fiberglass fabric coated with a silver rubberized silicone. It resists abrasion, flexing, tear and puncturing. It protects from water, oil and chemical products and generates little smoke.

Applications

This cloth is often used in the fabrication of spark and molten metal splash protective curtains, removable blankets, expansion joints and flange covers.

Specifications

Color	Grey
Weight (oz/vg ²)	15
Thickness	0.015"
Temperature	260°C (500°F)
